PowerPlay™ PT-540 Multi-Tool - is a complete tool kit that fits in your hand. It is 30 tools-in-one and is designed for datacomm, telecom and electrical installations. It can handle jobs from punching in drywall to punching down 110 and 66 telephone jacks or panels. Some highlighted tools it includes are: 110/66 punchdown blades, UTP & round wire strippers, hook & spudger, 24-14 AWG lug terminal crimpers, drywall saw & punch, wire cutters and scissors.

PA-6520

PowerPlay™ PT-525 Multi-Tool - is a complete tool kit that fits in your hand. It is 24 tools-in-one and is designed for datacomm, telecom and electrical installations. It can handle jobs from punching in drywall to punching down 110 and 66 telephone jacks or panels. Some highlighted tools it includes are: 110/66 punchdown blades, UTP wire stripper, hook & spudger, needle nose & gripping pliers, drywall saw & punch, 3-in-1 file and knife.

PA-6510

PowerBlade Multi-Tool - This tool comes with a SOG® blade with a bevel edge. It includes 0.150" - 0.250" cable strippers, 22-10 AWG wire strippers, and a UTP stripper on the back end. The knife is manufactured from AUS 8 stainless steel and the handle is lightweight military-style Zytel plastic. The blade also has a liner lock blade release system to keep the knife securely locked.

Paladin Tools®

Twisted Pair Cable

DataComm Scissors - Paladin scissors cut and strip data, phone and electrical cables. They are made for datacomm, telecom and electrical wiring professionals. Comes with "V" stripping notches for 19 and 23 AWG wire. It is manufactured from high quality forged steel with durable nickel plating.

PA-1925

All-in-One Phone & Data Tool - This tool has 3 crimp profiles for RJ45, RJ11/12 & RJ22 modular plugs. It also has 3 cutting/stripping functions for round and flat communication cables. Terminations are made easier with the advanced ratcheting mechanism and rubber embedded handles.

PA-1556

All-in-One Pro Telephone Tool - Our pro all-in-one tool cuts, strips and crimps telephone and data cables. Crimps RJ11/12, RJ22 & RJ45. Comes with ratcheting mechanism and embedded handles.

PA-1530R

SurePunch® Pro Punchdown Tool with 110 & 66 Blade & LED light - The SurePunch® Pro terminates cable in a single punch including 23 AWG Cat6. It comes with a detachable LED light to eliminate working in the dark. It includes finger grips and a non-slip rubber-embedded handle for comfort. It also comes with a pick, hook and spudger that lock in place when being used. The tool has additional blade storage with latch cover.

PA-3587

SurePunch® Pro Punchdown Tool with 110 Blade & LED light - This tool is the same as the PA-3587 except it can only terminate 110 style jacks and panels. It comes with an LED light and all the features mentioned above.

PA-3596

SurePunch® Pro & SurePunch® Blades - These punchdown blades will fit both the SurePunch® Pro and the regular SurePunch®. They twist-and-lock into place. Part number PA-4591 is a patented double 110 punchdown blade that does twice the work of a regular 110 blade.

- 1) PA-4571 (110/66)
- 2) PA-4572 (110)
- 3) PA-4573 (66)
- 4) PA-4574 (BIX)
- 5) PA-4575 (Krone)
- 6) PA-4591 (Double-110)

ProPunch™ 110 Multi-Pair Punchdown Tool - Terminates and cuts five pairs of data and voice cable at the same time. Designed to perform over 30,000 cycle punches and terminate 23 AWG cable pairs in one punch.

PA-3560

stripax® Pro 6 - The original stripax® set the industry standard for precision stripping. Performs powerful stripping for standard and industrial insulations for a wire range of 28-10 AWG. (THHN & THHW) Contoured handles let you hold the tool in a natural position. It's able to strip PVC, rubber and silicone insulations.

PA-1113

GripPack SurePunch® Pro Technicians's Kit - This kit includes a cutter/stripper for data, telephone and network installations. It also comes with datacomm scissors, SurePunch® Pro punchdown tool with detachable LED light, MagLite flashlight and a black Sharpie pen. The GripPack is form fitted so your tools stay in place. It has a detachable belt clip that swivels while you work and won't fall off.

PA-4941

GripPack SurePunch® Pro Installer's Kit -

This kit includes a cutter/stripper for data, telephone and network installations. It also comes with datacomm scissors, SurePunch® Pro punchdown tool with detachable LED light. The GripPack is form fitted so your tools stay in place. It has a detachable belt clip that swivels while you work and won't fall off.

Coax Cable

SealTite® Pro Crimper - Fully adjustable to crimp most common compression Cable TV "F", BNC & RCA connectors. Thumb screw adjusts crimp height & head reverses to cable TV "F" or BNC/RCA. Features advanced ratchet system and comfortable rubber-embedded handles.

PA-1555

Combo UTP/Coax SureStrip™ - is a professional cutter/stripper for coax & twisted pair cables. Coax strip blades are pre-set for 2-level compression, hex, push-on, or twist-on "F", RCA or BNC connector strip lengths. UTP stripper blades self-regulate to prevent nicks. Hex key included to adjust blade-cutting depth on coax blades.

PA-1119

Coax 3-Way Tool - has a unique design that combines three coax cable installation functions into a single tool for maximum utility: flaring and cable TV "F" attachment tools to make connector assemblies quickly and effortlessly, and an extraction tool to access cable TV "F" jacks more easily.

Paladin Tools®

Testers

Butt Set - Portable handset for installers and repair technicians to use for line testing and temporary communications. It is phone line powered and provides DTMF and dial pulse outputs. Features talk, ring and monitor modes; the monitor mode is high impedance and does not interfere with data, conversation or signaling. LED identifies polarity. Has memory storage for 10 frequently dialed numbers and last number redial. Field replaceable spring-loaded belt clip and line cord.

PA-1780

PC Cable-Check™ Pro - More than just a computer cable tester, this powerful unit verifies pin-out or troubleshoots problems for more over 20 cable types including: LAN & Telephone, Serial, BNC Coax, USB, VGA, Mini-USB, S-Video, FireWire, PS/2 Keyboard and Parallel Printer. It detects good connections and any opens, shorts or crosses in the cabling. Features include auto test or manual test modes, auto-off to extend battery life, a rugged case with built-in handle for easy transport and rubber feet to grip to desk or bench to prevent slipping. 9V battery included.

PA-1577

Tone & Probe Plus Cable-Check™ - is a unique combination of a tone and probe cable tracer along with an RJ45 LAN tester that maps the cable to identify connector and cable pin-out. The unit also provides full-range continuity testing, line condition, signal tracing and wire identification. Carrying case, two RJ45 patch cords and RJ11 with alligator clip cord and two 9V batteries included.

PA-1573

LAN & A/V Cable-Check™ - Combination tester designed for smart home installations to quickly test continuity of RJ45 network and Cable TV "F", RCA & BNC coax cables. Maps cable pin-out for network cables and identifies its wiring schemes. Tests continuity for both network and coax cabling to identify good connections, opens and shorts. Includes everything you need to test patch cables or installed cabling all stored in a carrying case.

Data/Link ID and Cable-Check™ - is a multi-purpose continuity tester and net identifier. Cable-Check maps cable for both data and telephone connection schemes. The Data/L ID identifies the data and link transmission speeds along with the PC and HUB communications link pulses. Carrying case, patch cords and batteries included.

PA-1576

LAN Cable-Check™ - tests the continuity of RJ45 data and network configurations for patch cords or installed cable runs. It maps the cable and identifies good connections, opens, shorts and crosses. Includes patch cords, 9V battery and carrying case.

PA-1574

LAN ProNavigator® - is now even more functional! It now tests all residential coax Cable connections including cable TV "F", RCA and BNC along with Cat5e network cabling. Super quick PASS/FAIL test results in one second! Identify any opens, shorts, crosses or split pairs with the Fault Check Function. Main unit also generates oscillating tone in TONE function to trace wires using a speaker probe (not included). Auto-off to conserve battery power. 9V battery, belt clip, patch cords and cable adapters included.

Communications tools and testers are our business so we understand your needs in the field. Our tool kits offer complete solutions to support today's technologies and we strive to make your job easier to accomplish with the selection of the right tools, testers and accessories.

Tool kits are available in blow-molded cases with form-fitted foam, soft-sided zipper portfolio-style or in our Ultimate Tool Bag that comes complete with a removable tool caddy and a Plano® divided box to organize small items.

The Ultimate Technician Tool Kit - is one of our premier kits and completely equips you to handle data, voice or video installation and maintenance jobs. It includes all necessary cable preparation tools, tone and probe and continuity testers for Cat5, Cat5e and Cat6 twisted pair as well as coax cable.

PA-4932

The Ultimate Premise Service Tool Kit - is designed for on the go LAN professionals; it provides all the tools and testers needed to maintain your data, voice and video networks.

PA-4933

The Ultimate DataReady® Pro

Tool Kit - is designed for installers or technicians needing a data cable tool kit solution. It includes all the tools you need for Cat 5, Cat5e and Cat6 installation or maintenance in our rugged tool bag.

SealTite® Pro A/V Bundle - is used to build custom-length component video, digital and analog cables for smart home installations. Combined, these tools will terminate most compression RCA, BNC and cable TV "F" connectors that are used for RG59, RG6 and RG6 Quad coaxial cable.

PA-4915

SealTite® Pro Compression Crimp Kit - is a compact kit for smart home installations. It has been changed to include an upgraded cable TV "F" flaring tool/insertion tool that helps prep RG59, RG6 and RG6 Quad coaxial cables. All the professional tools come in a zipper case that is easy to carry around the worksite.

PA-4910

Network Tool Bundle - has professional tools for small contractors or new professionals installing networks. It includes everything you need but the cable to get the job done. Cut, strip, crimp and terminate for network installations.

PA-4909

Datacomm Pro Starter Kit - is also a starter kit for datacomm professionals. Have all the tools you need for cutting, stripping, crimping and terminating network installations. All the professional tools come in a zipper case that is easy to carry around the worksite.

DataShark®

Twisted Pair Cable

Combo Cutter/Stripper for Coax & UTP - The universal tool cuts and strips datacomm cables including: Cat5, Cat5e, Cat6 networking cable and flat satin phone cable. It will also cut & strip coax cable. The blades are adjustable for cutting depth for network cable with a simple thumb screw.

PA-70029

RJ45 & RJ11/12 Modular Plug Crimper - DataShark's most popular crimper that assembles computer and phone cords. Crimps RJ45 computer cables and RJ11 or RJ12 phone cables. It will also cut and strip round Cat5, Cat5e or flat satin phone cable.

Fax: +1.815.397.9247

Wire Stripper Bundle - Wire stripper bundle includes PA-70056 (22-10 AWG) and PA-70057(30-20 AWG). They both can cut and strip solid and stranded electrical, speaker, hook-up wire and multi-conductor cable. They will also cut flat cables. Precision-ground stripping cavities prevent any scoring on wires. They are spring loaded and include a built-in safety lock.
PA-70058

Non-Impact 110 Punchdown Tool - Terminate Cat5, Cat5e & Cat6 cable into 110-style wall jacks and patch panels for computer and phone systems. While terminating it will cut off excess wire in a single step.
PA-70034

Impact 110 Punchdown Tool - Terminate 110-style patch panels and jacks quickly and easily. The impact tool features a spring mechanism that properly installs cable and cuts off excess wire in a single step. Requires less effort than non-impact punchdown tools.
PA-70060

RJ45 Network Tester Kit - Quickly and easily test your computer cables or installed cable runs to verify good connections or troubleshoot problems. It will identify good connections, opens, shorts, and cross-connections. Includes the ability to switch between fast and slow testing speeds.

Tool Kits & Bundles

Computer Network Tool Kit with Cat5e Cable -

Build custom-length computer cables with this all-in-one kit. You have the ability of also installing and upgrading computer wall jacks around the home or office. The kit includes cable stripper for Cat5e, Cat6 and flat satin, RJ45, RJ11/12 crimper, non-impact punchdown tool, 10-RJ45 modular plugs and 75' of Cat5e cable.

PA-70027

Satellite & Cable TV Tool Kit with RG6 Coax Cable -

Build custom-length compression cable TV "F" cables for satellite, digital cable & other video applications. The kit includes coaxial cable cutter, coaxial cable stripper, 3-in-1 crimper for compression "F", RCA & BNC connectors. It also comes with 10 compression cable TV "F" connectors for RG6/6 Quad and 75' of RG6 coax cable.

PA-70028

DIY Computer and Phone Crimp Bundle -

This is a complete bundle that is used for building custom-length RJ45 computer and RJ11/12 phone cables. The kit includes a universal cable stripper, RJ45 & RJ11/12 modular plug crimper, 10-RJ45 modular plugs and 10-RJ11 phone plugs.
